DIRECTOR OF CENTRAL INTELLIGENCE

Scientific and Technical Intelligence Committee 21 MAR 1984 LOGGED

21 March 1984

MEMORANDUM FOR: Deputy Director of Central Intelligence

FROM:

[REDACTED]
Chairman, Scientific and Technical
Intelligence Committee

25X1

SUBJECT: Monthly Report - March 1984

25X1

1. *The Committee's Annual Meeting*

Early this month the Committee held its annual meeting at [REDACTED]. The Committee reviewed STIC and Collection Subcommittee performance in 1983, reviewed the progress of its working groups, and discussed Intelligence Community-R&D Community interactions and [REDACTED] problems. Discussions were also held with [REDACTED] and Dr. Julian Nall, the NIO S&T, on topics of mutual interest. 1983 was the most productive year in the Committee's history; eighteen finished documents were produced--2-1/2 times higher than at any other time in the STIC's history. [REDACTED]

4. *Resource Aid*

Dr. Robert Cooper, Director of the Defense Advanced Projects Research Agency, recently offered technology consulting help to the STIC. One of the Committee's major problems in producing comparative technology analysis has been its limited knowledge of US and Western technology. Dr. Cooper proposed the DARPA consultants work with the Committee's working groups to provide accurate information on US and Western R&D programs. []

5. *Reports Published*

During March, the STIC published two collection guides []

25X1

[] These collection guides are designed to give the collector a general background in these areas and provide basic questions for the collector to use. []
